

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Samuel (Reg. No. 57,905), the undersigned, on July 17, 2009.
3. The application has been amended as follows:

**IN THE SPECIFICATION:**

Please replace the first paragraph of page 2 of the specification by the following paragraph:

-- Also, this application relates to the following co-pending U.S. Patent Applications, filed concurrently herewith, by Andrew Thomas Busey, which are assigned to the assignee of this application, and which are incorporated herein by reference in their entirety: (a) U.S. Patent Application Serial No. 10/578,411, entitled METHOD, SYSTEM, AND COMPUTER PROGRAM PRODUCT FOR SAVING A SEARCH RESULT WITHIN A GLOBAL COMPUTER NETWORK; (b) U.S. Patent Application Serial No. 10/578,417, entitled METHOD, SYSTEM AND COMPUTER PROGRAM PRODUCT FOR TRANSLATING INFORMATION FOR COMPATIBILITY WITH AN

INFORMATION HANDLING SYSTEM, now U.S. Pat. No. 7,526,573; (c) U.S. Patent Application Serial No. 10/578,606, entitled METHOD, SYSTEM AND COMPUTER PROGRAM PRODUCT FOR AUTOMATICALLY PERFORMING AN OPERATION IN RESPONSE TO INFORMATION; and (d) U.S. Patent Application Serial No. 10/578,415, entitled METHOD, SYSTEM AND COMPUTER PROGRAM PRODUCT FOR SYNCHRONIZING INFORMATION WITHIN A GLOBAL COMPUTER NETWORK.--

IN THE CLAIMS:

The claims of the invention have been amended as follows:

1. (Previously Presented) A method performed by at least one information handling system having a first storage device maintained at a first remote server, the method comprising:

in response to a first command from a first user, retrieving by the first remote server information, about one or more websites, the one or more websites being hosted on one or more second remote servers different from the first remote server;

providing, by the first remote server, a user terminal with an excerpt of the information in an XML-format to allow the user terminal to access one of the one or more websites for display on a user display device;

transmitting, by the first remote server to the user terminal, a list of folders to simultaneously display on the user display device with the excerpt of the XML-formatted information, the list of folders including at least one of a public folder and a group folder;

in response to a second command from the first user, saving in the first remote server the displayed excerpt of the XML-formatted information in a folder that is selected by the first user from among the displayed list of folders; and

in response to a third command from the first user, selectively enabling access to the selected folder including the excerpt of the XML-formatted information, via the first remote server, by one or more second users specified by the first user.

2. (Original) The method of claim 1, wherein the one or more second users is a single second user preselected by the first user.

3. (Original) The method of claim 1, wherein the one or more second users is a group of second users preselected by the first user.

4. (Original) The method of claim 1, wherein selectively enabling access comprises:

in response to a command from the first user before saving the displayed excerpt, selectively enabling access to the selected folder by one or more second users specified by the first user.

5. (Original) The method of claim 1, wherein selectively enabling access comprises:

in response to a command from the first user after saving the displayed excerpt, selectively enabling access to the selected folder by one or more second users specified by the first user.

6. (Original) The method of claim 1, and comprising:

associating other information with the saved excerpt in the folder, so that access to the saved excerpt includes access to the other information.

7. (Original) The method of claim 6, wherein the other information has a non-XML format.

8. (Original) The method of claim 6, wherein the other information is a human-readable text message.

9. (Original) The method of claim 6, wherein the other information is a hyperlink to a website.

10. (Original) The method of claim 1, wherein saving the displayed excerpt comprises:

saving the displayed excerpt of the XML-formatted information in an XML format.

11. (Previously Presented) The method of claim 1, wherein displaying the excerpt comprises:

displaying the excerpt of the XML-formatted information in a non-XML format.[[.]]

12. (Original) The method of claim 11, wherein the non-XML format is an HTML format.

13. (Previously Presented) A system, comprising:

at least one information handling system having a first storage device maintained at a first remote server, the at least one information handling system configured for:

in response to a first command from a first user, retrieving by the first remote server information, about one or more websites, the one or more websites being hosted on one or more second remote servers different from the first remote server;

providing, by the first remote server, a user terminal with an excerpt of the information in an XML-format to allow the user terminal to access one of the one or more websites for display on a user display device;

transmitting, by the first remote server to the user terminal, a list of folders to simultaneously display on the user display device with the excerpt of the XML-formatted information, the list of folders including at least one of a public folder and a group folder;

in response to a second command from a first user, saving in the first remote server the displayed excerpt of the XML-formatted information in a folder that is selected by the first user from among the displayed list of folders; and

in response to a third command from the first user, selectively enabling access to the selected folder including the excerpt of the XML-formatted information, via the first remote server by one or more second users specified by the first user.

14. (Original) The system of claim 13, wherein the one or more second users is a single second user preselected by the first user.

15. (Original) The system of claim 13, wherein the one or more second users is a group of second users preselected by the first user.

16. (Original) The system of claim 13, wherein the information handling system is for:

in response to a command from the first user before saving the displayed excerpt, selectively enabling access to the selected folder by one or more second users specified by the first user.

17. (Original) The system of claim 13, wherein the information handling system is for:

in response to a command from the first user after saving the displayed excerpt, selectively enabling access to the selected folder by one or more second users specified by the first user.

18. (Original) The system of claim 13, wherein the information handling system is for:

associating other information with the saved excerpt in the folder, so that access to the saved excerpt includes access to the other information.

19. (Original) The system of claim 18, wherein the other information has a non-XML format.

20. (Original) The system of claim 18, wherein the other information is a human-readable text message.

21. (Original) The system of claim 18, wherein the other information is a hyperlink to a website.

22. (Original) The system of claim 13, wherein the information handling system is for:

saving the displayed excerpt of the XML-formatted information in an XML format.

23. (Previously Presented) The system of claim 13, wherein the information handling system is for:

displaying the excerpt of the XML-formatted information in a non-XML format.

24. (Original) The system of claim 23, wherein the non-XML format is an HTML format.

25. (Previously Presented) A computer readable medium having stored thereon a set of instructions, which when executed by a computer having a processor and memory, cause the computer to perform operations, comprising:

in response to a first command from a first user, retrieve by the first remote server information, about one or more websites, the one or more websites being hosted on one or more second remote servers different from the first remote server;

provide, by the first remote server, a user terminal with an excerpt of the information in an XML-format to allow the user terminal to access one of the one or more websites for display on a user display device;

transmit, by the first remote server to the user terminal, a list of folders to simultaneously display on the user display device with the excerpt of the XML-formatted information, the list of folders including at least one of a public folder and a group folder;

in response to a second command from the first user, saving in the first remote server the displayed excerpt of the XML-formatted information in a folder that is selected by the first user from among the displayed list of folders; and

in response to a third command from the first user, selectively enable access to the selected folder including the excerpt of the XML-formatted information, via the first remote server, by one or more second users specified by the first user.

26. (Previously Presented) The computer readable medium of claim 25, wherein the one or more second users is a single second user preselected by the first user.

27. (Previously Presented) The computer readable medium of claim 25, wherein the one or more second users is a group of second users preselected by the first user.

28. (Previously Presented) The computer readable medium of claim 25, wherein the computer program is processable by the information handling system for causing the information handling system to:

in response to a command from the first user before saving the displayed excerpt, selectively enable access to the selected folder by one or more second users specified by the first user.

29. (Previously Presented) The computer readable medium of claim 25, wherein the computer program is processable by the information handling system for causing the information handling system to:

in response to a command from the first user after saving the displayed excerpt, selectively enable access to the selected folder by one or more second users specified by the first user.

30. (Previously Presented) The computer readable medium of claim 25, wherein the computer program is processable by the information handling system for causing the information handling system to:

associate other information with the saved excerpt in the folder, so that access to the saved excerpt includes access to the other information.

31. (Previously Presented) The computer readable medium of claim 30, wherein the other information has a non-XML format.

32. (Previously Presented) The computer readable medium of claim 30, wherein the other information is a human-readable text message.

33. (Previously Presented) The computer readable medium of claim 30, wherein the other information is a hyperlink to a website.

34. (Previously Presented) The computer readable medium of claim 25, wherein the computer program is processable by the information handling system for causing the information handling system to:

save the displayed excerpt of the XML-formatted information in an XML format.

35. (Previously Presented) The computer readable medium of claim 25, wherein the computer program is processable by the information handling system for causing the information handling system to:

display the excerpt of the XML-formatted information in a non-XML format.

36. (Previously Presented) The computer readable medium of claim 35, wherein the non-XML format is an HTML format.

37. - 39. (Canceled)

40. (Previously Presented) The method of claim 1, wherein the selectively enabling access to the selected folder by one or more second users is provided regardless of whether the first user is online.

41. (Previously Presented) The method of claim 1, further comprising receiving, from the user terminal, a web page address to retrieve the excerpt of XML-formatted information, about one or more websites, from the first storage device maintained at the first remote server, prior to providing the user terminal with the excerpt of XML-formatted information.

42. (Previously Presented) The method of claim 1, further comprising:  
  
in response to a search term query, providing search results of a list of web pages comprising the queried search term; and

receiving, from the user terminal, a selection of a web page from the list of web pages, prior to providing the user terminal with the excerpt of XML-formatted information.

#### **ALLOWABLE SUBJECT MATTER**

4. Claims 1-36 and 40-42 (renumbered as claims 1-39) are allowable over the prior art of record.

5. Examiner interprets the limitation "computer-readable medium" as a device that stores computer instructions and participates in providing the computer instructions to a computer processor for execution. The computer-readable medium includes non-volatile media, volatile media, computer storage devices and memories. For example, optical or magnetic disks, ROMs, PROMs, EPROMs, EEPROMs, RAM, hard disks, CDs, DVDs. The "computer-readable medium" does not include acoustic or electromagnetic waves, such as those generated during radio-wave, infra-red, and optical data communications.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip B. Tran whose telephone number is (571) 272-3991. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

8. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
